Blasting Ltd**

Fleet & Equipment

**Multiple
simultaneous crews**
*Nationwide Deployment
Capability*

11 Teams
with 15 operatives

19 Blasting Systems
*Including compressors,
blast pots, dust
suppression systems and
access equipment.*

Case Study 1:

Warehouse Refurbishment *Doncaster*

Contract Value: £150,000

Duration: 6 Weeks

➔ **Problem:**

The client required a one-stop solution for the structure. A key requirement was for the steelwork to be primed immediately after blasting to prevent surface contamination or deterioration, either of which could compromise coating adhesion.

➔ **Result:**

Premier Blasting supplied a five-person, multi-skilled team to carry out the shot blasting and apply a fire-protective primer in carefully planned stages, completing each section within a single day. The team maintained continuous progress throughout the project, minimising downtime and ensuring the warehouse was completed to the client's requirements and on schedule.

Case Study 2:

ISS Property – Former Bakkavor Foods Facility

Wigan

Contract Value: £40,000

Duration: 150 hours

➔ Problem:

ISS Property required the structural steelwork at the former Bakkavor Foods facility to be prepared to an SA 2.5 surface finish before the application of an intumescent fire protection coating.

With sections of the steelwork exposed to the elements, weather conditions presented a significant challenge. The client required a complete one-stop solution, with shot blasting followed immediately by the application of a certified primer and topcoat to meet fire protection specifications and prevent flash rusting.

➔ Result:

To ensure an accurate quotation and realistic programme, we carried out a comprehensive site survey. Each steel section was measured and assessed to calculate the precise blasting time required, allowing us to develop an efficient project schedule.

Through extended working hours and weekend shifts to take advantage of favourable weather conditions, we completed the project in 10 days—five days ahead of programme—without compromising quality or compliance.
